

When oral medication isn't an option.

All too often, babies and children can't—or won't—take medication orally. When that happens, FeverAll® is a quick route to fever and pain relief. FeverAll is the only brand of acetaminophen suppository, and parents trust it to be safe and effective. So urge moms and dads to keep it on hand at all times. That way, they can take care of the fever, and be sure to give the right dose. **More peace of mind for parents. Fewer worried phone calls for you.**

The alternate route to relief
